Advanced Manufacturing Program

Created By

2010

The area's top industries are seeking the next generation employee to operate their cutting-edge manufacturing plants. They are committed to providing a challenging and rewarding opportunity for high school students interested in gaining skills for a lifetime.

The Advanced Manufacturing Industry is growing and looking for employees with a diverse set of technical skills to join their team. The **Advanced Manufacturing Program (AMP)** is a unique dual credit initiative within the Texoma area that allows students to complete college courses starting as early as the 10th grade. You will learn skills unique to Advanced Manufacturing and gain real-world, hands-on training through industry driven curriculum. Upon completion of the program, you can go directly into the workforce while continuing your education at Grayson College, or continue your education at a four-year institution.

While in high school, the Advanced Manufacturing Program provides students with the following:

- Up to \$4,900 worth of tuition and books for **FREE!***
- Up to 41 college credit hours completed in high school
- Two College Certificates:
 - **Basic Manufacturing Technology Certificate**
 - **Advanced Manufacturing Technology Certificate**
- Opportunity to earn a **Nationally Recognized Manufacturing Certification**
- Paid internship at a local manufacturing industry*
- A pathway to a career you can be proud of!

*Must apply for scholarship annually and proof of authorization to work in the United States is required.

This program was created by local industries, school districts, Grayson College, Sherman Economic Development Corporation, Denison Development Alliance, and Workforce Solutions Texoma. To learn more, visit MadeInTexoma.com.
